

MIGRATING OPENTEXT SYSTEMS TO MICROSOFT AZURE

MICROSOFT AZURE FOR ENTERPRISE CONTENT MANAGEMENT (ECM)

As more organizations are embracing cloud computing, the Microsoft® Azure platform is fast becoming a leading platform to address how efficiently IT resources are used. At IQBG, we help you take advantage of everything Microsoft Azure has to offer—from migrating legacy applications to creating custom solutions.

OUR AZURE APPLICATION MIGRATION SOLUTIONS CAN HELP YOU

- Move applications out of “legacy” environments to the cloud, to take advantage of low-cost, low-touch runtime environments.
- Scale easily and on demand to provide capacity only when you need it and to handle unexpected load changes.
- Significantly increase the capacity of your existing infrastructure and achieve high-performance computing.
- Quickly improve performance and reduce costs through our unique portfolio of design assets, frameworks, reusable components and thought leadership.
- Reduce the time it takes to pilot and test solutions with much higher availability.
- Rapidly improve your business agility and flexibility while simultaneously reducing infrastructure, maintenance and energy costs.

IQBG SERVICES FOR MICROSOFT AZURE PLATFORM

TAKE YOUR APPLICATIONS AND SERVICES TO THE CLOUD

Cloud computing includes a variety of services that are changing the way companies do business. From compute power and data storage to network bandwidth and applications, the possibilities are almost endless. It's no surprise, then, that organizations are rushing to cloud computing—and to the Microsoft Azure platform—as a way to balance cost and agility, and solve a variety of business needs.

IQBG is uniquely qualified to help you migrate your existing applications to the Microsoft Azure platform through a combination of market-leading cloud vision, industry insight, business acumen and delivery skills. As a result, you'll be able to migrate more quickly and efficiently—and start reaping its benefits faster. Our Azure Migration solution portfolio includes:

- Application Assessments
- Application Proof of Concepts
- Application Migration Delivery

WORK WITH IQBG AND MIGRATE WITH CONFIDENCE

IQBG services for cloud migration can help you boost your return on investment, giving you an optimized total cost of ownership. We've found that migrating solutions to the Microsoft Azure platform can improve their performance up to 50 percent—while simultaneously lowering operational costs and downtime.

Our highly skilled and experienced workforce can deliver the right mix of project support at scale so you can achieve the full value of the Microsoft Azure platform quickly and predictably. In addition, our flexible delivery process includes both on-shore architects and off-shore developers who use industrialized delivery processes and tools to support migrating and building applications on the Azure platform.

THE IQBG ADVANTAGE

IQBG and our partner company MINT Technology Group are Microsoft's global system integrator partners of choice for the Microsoft Azure platform. Through an unmatched mix of vision, insight and experience, we already possess the cloud migration skills customers are looking for—and we're putting these skills to work every single day. We can help you achieve your business goals faster.

IQBG offers the most trusted and proven Enterprise Content Management implementations in the marketplace. Our approach to ECM will bring efficiency and ease to the process lifecycle or submitting, reviewing, approving, storing and accessing data in your system.
